Valary Akinyi
Software Developer

Valary is a Front-End Developer, looking for an opportunity as a Junior Software Developer. She has skills in Vanilla JavaScript, HTML/CSS and React, Vue.js, and currently learning Node.js. She is passionate about creating human-centered designs and providing human-centered solutions and performing in deadline-driven environments. She has to lead a team of five interns into building a recruitment system and also participated in a hackathon that sought to solve systemic corruption using XR and became position three. She is currently working on a node js project that creates an API that will be used for a profile manager.
